

ENERGY & OIL FIELD

Claims Adjusting

Work with Dedicated Oil & Energy Field Experts

Properly adjusting damage to heavy equipment used in oil fields and throughout the energy industry requires a very particular set of skills.

When you assign your oil field and energy equipment claims to The Doan Group, we'll in turn assign it to one of our adjusters who is highly qualified to handle it. Beyond just handling the claim, we'll provide whole-loss management to minimize severity.

Your Doan adjuster will investigate beyond the obvious damage, relying on their deep expertise to uncover that which isn't immediately apparent. We'll compile a complete report in a single trip and therefore eliminate unnecessary costs when things get missed by less qualified adjusters, possibly necessitating multiple trips.
